## Schemas

### ApiResponse ▾ {

```
  timeStamp      string($date-time)
  message        string
}
```

### CitizenSignInRequest ▾ {

```
  aadharID*      integer($int64)
  password*      string
}
```

### CitizenDTO ▾ {

```
  citizenID      integer($int64)
  aadharID       integer($int64)
  firstName      string
  lastName       string
  phoneNo        string
  state          string
  district       string
  city           string
  pinCode        string
  dob            string($date)
  gender         string
  Enum:
    ▾ [ MALE, FEMALE, OTHER ]
  hasTakenFirstDose  boolean
  hasTakenSecondDose boolean
  hasReviewedFirstDose boolean
  hasReviewedSecondDose boolean
  hasBookedFirstDose boolean
  hasBookedSecondDose boolean
}
```

```

VaccinationCertificate ▾ {
  firstName      string
  lastName       string
  age            integer($int32)
  aadharId       integer($int64)
  gender         string
                  Enum:
                    ▾ [ MALE, FEMALE, OTHER ]
  vaccinationStatus string
}

```

```

BookVaccineDTO ▾ {
  centerId*      integer($int64)
  aadharId*      integer($int64)
  date*          string($date)
}

```

```

AddVaccinationRecord ▾ {
  aadharCardId*  integer($int64)
  centerId*      integer($int64)
}

```

```

CenterSignInRequest ▾ {
  centerId*      integer($int64)
  password*      string
}

```

```

CenterDTO ▾ {
  name           string
  state          string
  district       string
  city           string
  pincode        string
  stock          integer($int32)
}

```

```

BookingDTO ▾ {
  firstName      > [...]
  lastName       > [...]
  aadharId       > [...]
  date           > [...]
}

```

### NewCenterRegistrationDTO ▾ {

```
  name*           string
  state*          string
  district*       string
  city*           string
  pinCode*        string
  stock*          integer($int32)
  password*       string
}
```

### AadharCardDTO ▾ {

```
  firstName*      string
  lastName*       string
  dob*            string($date)
  gender*         string
                  Enum:
                  ▾ [ MALE, FEMALE, OTHER ]

  state*          string
  district*       string
  city*           string
  pinCode*        string
}
```
